

Testing Lab Information

Thank you for contacting the National Wood Flooring Association (NWFA) about your flooring concerns.

If you are unclear as to what type of flooring is installed in your home, we recommend that you have it evaluated by a certified wood flooring professional to define whether you have a factory-finished or site-finished solid wood, engineered wood, or other type of floor.

You can find a certified wood flooring professional in your area to help you define your floor type by searching with your zip code: <http://woodfloors.org/certified-professional-search.aspx>.

Further, the NWFA does not conduct wood flooring product testing. An alphabetical list of independent testing labs is provided below for your convenience.

Please note that the NWFA is not affiliated with, nor endorses, any lab listed below. NWFA also cannot provide you with any estimate on testing costs; please contact labs directly for fee information.

ABIC Testing Laboratories, Inc.

24 Spielman Road
Fairfield, NJ 07004
